SUMMARY

Senior Full Stack Engineer with 6+ years of experience designing and building scalable cloud-native applications, distributed systems, and AI-powered solutions using Node.js, TypeScript, React.js, NestJS, PostgreSQL, MongoDB, AWS, and Docker. Experienced in architecting microservices, event-driven systems, real-time applications, and production-ready REST/GraphQL APIs. Hands-on experience integrating LLMs (OpenAI, Claude), prompt engineering, workflow automation, AI document processing, and modern AI development tools. Passionate about system architecture, engineering best practices, performance optimization, and mentoring teams while delivering scalable software from design through production.

SKILLS

- JavaScript, TypeScript, Python, Git, GraphQL, SQL, Postgres, Git, ReactJs, MongoDB. Python OpenAI API Claude API Prompt Engineering LLM Integrations AI Document Processing Workflow Automation n8n Zapier Google Apps Script, Twilio, WebRTC
- NodeJs, NestJs, ExpressJs, Nginx, Github, Gitlab, BitBucket, Github Actions, Jest, Bootstrap, Tailwind,
- Mocha, RabbitMQ, Kafka, AWS Lambda, Terraform, WebSocket, Puppeteer, Prisma, OracleDB, React Query, Redux Toolkit, Context API, React Hooks, and Next.js.
- Tencent Cloud COS, Datadog, Doppler, Rest APIs.
- Operating Systems, Microservices, Backend, Frontend, AWS, Agile, Docker, Kubernetes, CICD Pipelines.

WORK EXPERIENCE

Senior Software Engineer (Contract)

06/2025 – 06/2026

CPaxtra (Makro Thailand) · Remote

- Designed and **architected** a cloud-native bank reconciliation platform processing financial settlements across 352+ retail stores, integrating 13 payment providers with POS systems using NestJS, PostgreSQL, Prisma, and AWS.
- Integrated **AWS Cognito for secure authentication**, leveraging access and refresh tokens for improved security and scalability.
- Built a **Node.js/Express REST API** integrating with Makro's **Oracle RMS via PL/SQL stored procedures**, enabling frontend systems to create and manage Purchase Orders digitally, replacing a fully manual process.
- Developed **Playwright and Puppeteer-based browser automation** to download bank statements from bank portals and generate PO PDF reports from Oracle BI Publisher, reducing manual effort to **zero**.
- Built responsive **React.js** dashboards for finance and reconciliation workflows using **TypeScript**.
- Built an automated document ingestion and processing pipeline supporting CSV, Excel (XLS/XLSX), and PDF files from 13 financial institutions, validating and transforming financial records into normalized datasets for downstream reconciliation workflows.
- Developed automated data pipelines integrating Microsoft Graph API, SharePoint, Tencent Cloud COS, PostgreSQL, and asynchronous job queues, eliminating manual file handling and ensuring reliable end-to-end processing.
- Configured **Datadog APM tracing**, **Doppler secrets management**, **Docker containerization**, and **Jenkins CI/CD pipelines** for production deployment and observability across both systems.

Senior Software Engineer

12/2021 – 06/2025

KamelPay (Dubai, United Arab Emirates) • Hybrid

- Developed a multi-tenant architecture with a database-per-tenant model in MongoDB, efficiently managing **600+ client databases** within a single MongoDB cluster.
- **Improved** a time-intensive task in Node.js by leveraging worker threads, reducing execution time **from 2 minutes to milliseconds**.
- Configured Nginx as a reverse proxy, handling **20,000+** requests per day, improving load balancing by **40%**, and reducing response time by **50%**, resulting in a more scalable and high-performance application.
- Implemented CI/CD pipelines using GitHub Actions for continuous deployment, automating the build, test, and deployment process to ensure seamless and efficient application releases.
- Designed event-driven workflows using Apache Kafka to automate communication between distributed services processing 10,000–20,000 daily events.
- Developed customer-facing features using **React.js** and TypeScript.

Full Stack Developer

03/2021 – 11/2021

Hash Buckets (Karachi, Pakistan) • OnSite

- Implemented **CloudSploit** by **AquaSecurity** to enhance cloud security by scanning and securing over **3+** cloud environments (AWS, Azure, Google Cloud). Leveraged CloudSploit's plugins to identify and resolve more than **300+ critical** security issues, improving compliance with **CIS, HIPAA, and PCI-DSS** standards.
- Leveraged Google Cloud Pub/Sub to establish reliable, many-to-many, asynchronous messaging between applications, facilitating efficient communication and data exchange.
- Utilized MongoDB to store all risk reports, enabling fast and efficient retrieval of security risk data, reducing query latency and supporting **high-volume** data storage.

Full Stack Developer

06/2020 – 2/2021

Tedamatic Pvt Ltd (Karachi, Pakistan) • OnSite

- Designed a responsive timeline feature for an advanced news feed utilizing WebSockets and MongoDB, enabling instantaneous content updates that improved user engagement metrics by increasing average session **duration by 35%**.
- Built a real-time chat platform with **WebSockets and MongoDB**, ensuring seamless messaging and efficient storage of chat history.
- Revamped database queries and configured intelligent caching mechanisms, **resulting in a 40% increase** in response times during peak traffic periods while enhancing overall application performance for user satisfaction.
- Developed an online educational marketplace that enables users to **buy and sell learning materials**.

Computer Network Engineer intern

08/2017 – 05/2018

SrTechno (USA) • Remote

- Managed surveillance product deployments across multiple sites, optimizing system **reliability and security**.
- Provided ongoing support and maintenance for deployed solutions, troubleshooting issues and implementing enhancements as needed to optimize performance and reliability.

EDUCATION

University of Bahria || Karachi, Pakistan

B.S. Computer Science

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Artificial Intelligence, Mobile App Development, Software Engineering, User Experience/User Interfaces, Object-Oriented Programming.
